Celbridge,
Co. Kildare.

October 2009

Statement of Compliance with REACH Regulations.

Complete Leisure Supplies confirm that we are in full compliance with REACH regulations.

REACH (Registration, Evaluation and Authorisation of Chemicals), is a European Regulation designed to manage and control the potential risks to human health and the environment posed by the use of chemicals within the EU.

Complete Leisure Supplies are distributors of a range swimming pool chemical products that are either imported into Europe by others or manufactured in Europe by others, therefore our role in relation to REACH is as a distributor.

We must ensure that the suppliers and manufacturers we deal with are in compliance with REACH, and can confirm this to be the case. We are responsible for passing information, such as MSDS, down the supply chain to you as the end user, we must ensure that this information is applicable to the application of all users. We are obliged to pass relevant information from you, back up the supply chain in circumstances where the information does not cover the application for which you use our products.

Please contact us if you use our chemicals for any purpose other than swimming pool / spa water testing & treatment. Up to date MSDS are available from our office or on www.completeleisure.ie

If you are unsure about your obligations with regard to REACH, comprehensive information is available from the Irish Health & Safety Authority at www.hsa.ie

Stephen Ross
General Manager
